

DJM 63xx N gauge GWR 2-6-0 'Mogul' Project Newsletter #1

Hello everyone,

And welcome to the N gauge GWR mogul project newsletter #1.

Further newsletters will come on an as and when basis, dependant on new news to share with you regarding progress of this model.

As you know, this is, at present purely an 'expression of interest' to see if N gauge is really wanting this model.

To give you an example, we need 750+ 'expressions' of this model to make it "wash its face" and after just over a week, and before magazine advertising, and editorials hits everyone's consciousness, it stands at a total as of 128 models already 'expressed' for. To all of you I say thank you, and hope we can push this along quickly and get over the line allowing it to go ahead soon.

Whereas the King project took a while to garner the required figures, this one, being a smaller loco that pretty much went all over and got on most lines, should be easier. So fingers crossed here.

Design work has started in earnest now though so there is definite progress.

As with all my newsletters from now on, this newsletter is exclusively for you all, and I would ask that you don't divulge the information within to give all 'sigh ups' a change to read this over the next week. And sometime next Sunday I will put this on my web site for all to see.

Many thanks once again and I'll be in touch

Cheers

Dave
